PGCP-AC August 26
Database Assignment No-3

1. Write a query to calculate the total salary of all employees.

ANS -> SELECT SUM(salary) FROM employee;

2. Write a query to find the average salary of employees in each department using GROUP BY.

ANS -> SELECT DeptId, AVG(salary) FROM employee GROUP BY DeptID;

3. Write a query to count the total number of employees in each department.

ANS -> SELECT DeptID, COUNT(*) FROM Employee GROUP BY DeptID;

4. Write a query to display departments having more than 5 employees using HAVING clause.

ANS -> SELECT DeptID, COUNT(*) FROM Employee GROUP BY DeptID HAVING COUNT(*) >5;

5. Write a query to list distinct department locations from the Dept table.

ANS -> SELECT DISTINCT Location FROM Dept;

6. Write a query to display the highest salary among all employees. Write a query to display all total number of employee in table.

ANS -> SELECT MAX(Salary) FROM Employee;

SELECT COUNT(*) FROM Employee;

7. Write a query to find employees whose name starts with 'A' using LIKE operator.

ANS -> SELECT * FROM Employee WHERE EmpName LIKE 'A%';

8. Write a query to find employees whose name ends with 'n' using LIKE operator.

ANS -> SELECT * FROM Employee WHERE EmpName LIKE '%n';

9. Write a query to find employees whose name contains 'ra' using LIKE operator.

ANS -> SELECT * FROM Employee WHERE EmpName LIKE '%ra%';

10. Write a query to display all employees sorted by their Salary in descending order.

ANS -> SELECT * FROM Employee ORDER BY Salary DESC;

11. Write a query to display all employees sorted by DeptID ascending and then Salary descending.

ANS -> SELECT * FROM Employee ORDER BY DeptID ASC, Salary DESC;

12. Write a query to find employees whose salary is between 30,000 and 60,000.

ANS -> SELECT * FROM Employee WHERE Salary BETWEEN 30000 AND 60000;

13. Write a query to display all employees whose DeptID is in (10, 20, 30).

ANS -> SELECT * FROM Employee WHERE DeptID IN (10, 20, 30);

14. Write a query to display Min salary of employee .

ANS -> SELECT MIN(Salary) FROM Employee;

15. Write a query to display employees whose JoiningDate is between '2020-01-01' and '2021-12-31'.

ANS -> SELECT * FROM Employee WHERE JoiningDate BETWEEN '2020-01-01' AND '2021-12-31';

16. Write a query to display employees whose Salary is NULL.

ANS -> SELECT * FROM Employee WHERE Salary IS NULL;

17. Write a query to display employees whose Salary is NOT NULL.

ANS -> SELECT * FROM Employee WHERE Salary IS NOT NULL;

18. Write a query to calculate the total salary per department, but only for departments where total salary is greater than 1,00,000 (use HAVING).

ANS -> SELECT DeptID, SUM(Salary) FROM Employee GROUP BY DeptID HAVING SUM(Salary) > 100000;

19. Write a query to display all distinct employee names.

ANS -> SELECT DISTINCT EmpName FROM Employee;

20. Write a query to count the number of departments having the same location.

ANS -> SELECT Location, COUNT(*) FROM Dept GROUP BY Location HAVING COUNT(*) > 1;
